Projects

Investment Saving Dashboard - Web + Mobile App

April-2021:: Working

isd.thespecialsomething.com

Technologies Used: Ionic Framework, angular, laravel, Rest APIs, MySQL, Third-Party APIs (for cryptocurrency and traditional stocks data)

Little About Project: Investment Saving Dashboard is a web SPA + PWA and mobile (android + ios) app, its a completely free online solution for users to track their personal investments, this platform covers cryptocurrency investment, traditional stocks investment, and also personal savings, so you get to track all your saving in one place, check it out today it's completely free and (we are adding new features by each day :)

Invoice Online - Web SPA App

March-2021 :: April-2021

invoice.thespecialsomething.com

Technologies Used: Vuejs, InertiaJS, Laravel, Jetstream, Blade template, tailwindcss

Little About Project: Invoice online is a web SPA, where users can register themselves and then they can easily create invoices online, they can assign different invoices to different clients and can edit them, and once done creating invoice users can easily download the invoice as PDF and send them to their client for payment. it's a complete invoice solution available completely free of cost only :)

MYFREELANCER - Web App

May-2020 :: February-2021

myfreelancer.com

Technologies Used: Angular, Laravel, Restful APIs.

Little About Project: MyFreelancer is a Freelancing Portal. it basically an online freelancing portal where freelancers can get work and earn. and buyers can place their requests to get their work done.

ReadIt - ElectronJS Desktop App

December-2020 :: January-2021

github.com/ahsanmahmood/electron-app-releases/releases/tag/v1.0.3

Technologies Used: ElectronJS, TailwindCSS, HTML, Node, Javascript.

Little About Project: electron desktop app (windows + Linux + mac os), developed using electron js. this app contains an auto-update feature using GitHub releases. it's a simple URL bookmark app, where you can add URLs in a list and visit them later with the app or out from the app using key shortcuts.

Zeact Native - Mobile App

December-2020 :: December-2020

play.google.com/store/apps/details?id=com.zaions.zeactNativeApp

Technologies Used: React, React Native, Firebase, Google Maps.

Little About Project: native app (android + ios), developed using react native (expo workflow), it contains further sub-apps like a todo list app, a food category listing app, a complete shop app with user auth and orders/products management, a place listing app, and much more. I used many cool features in these different apps like accessing the device camera, user location, device gestures, and much more.

NodeJS/ExpressJS Website Project - Web App

October-2020 :: November-2020

aoneahsan-nodejs.herokuapp.com

Technologies Used: NodeJS, ExpressJS, ejs templating engine, MongoDB(Mongoose).

Little About Project: web app, developed using node-js, it is an e-commerce website where you admin can create new products, users can signup and sign in, users can buy products and they can get invoices for their orders and much more, I hope you will like this project. It was fun developing it.
